

Gili Trawangan Island, Lombok, Indonesia Diving Gili Trawangan

The diving

The abundance of fish found in the waters around Gili Trawangan will not disappoint any diver. Indonesia is home to more than 3,000 species of marine life and on the Gili Islands you will surely witness a great number of these species.

Some of the greatest fish seen during diving and snorkeling are white tip reef sharks, turtles, cuttle fish, moray eels, and leaf scorpion fish. Huge schools of fish move around the dive sites. For the diver more interested in coral, great rock formations at the deeper sights offer world class coral, some of the best in the world. There are sites here suitable for all levels of divers and a lot of dive sites to choose from. The distance between the dive center and all the dive sites is very short. You will have plenty of time to relax on land between all dives.

Dolphins are randomly spotted from the boat. From time to time Manta rays and whaleshark shows on dives. Keep your eyes open for a cool encounter!

Location

Above water Gili Trawangan is a backpacker mecca. The island is very relaxed and laid-back, with countless little beachside cafes serving elaborate seafood buffets, fresh salads and very good western and Asian food. Best of all, there are no cars or motorbikes to disturb the peace. The white sand beaches are without a doubt better than anywhere on Bali or Lombok. There is a strong environmental focus on the reefs after they have been damaged in the past. While once people came to dive, snorkel and party, a more up-market tourist is showing up now and while it is still all about the beach, there are many more options to wine and dine or hang out and meet new friends.

Your resort

Will be your cozy new home! By checking you in at a comfortable and lovely bungalow conveniently situated next to the dive center, your Gili experience and your diving course is complete. Breakfast is included and served at the resort. Your room will have air-con and hot shower for your convenience. At the resort, you will have just a few meters to the beach. The bungalows can be fully booked in high season. It is good to book 3 months in advance.

Your Room

This is only a selection of the many dive sites represented on this destination. No dive sites can be guaranteed since diving is dictated by the environment.

Shark Point

This is always a very popular dive site. Shark Point is a vast open dive site situated on the west side of Gili Trawangan and available to divers of all levels of certification. The site starts on a sloping reef, with a series of 3 ridges and valleys at 3 different depths, running parallel to the shore, leading into the deeper water and the site "Shark Point", an area which truly deserves its name. This is an excellent site for viewing the larger marine life. Turtles are almost guaranteed to be found in the shallower parts among the soft corals.

Manta Point

Situated on the south tip of Gili Trawangan, this site is a gentle slope starting at about 5 m and ending at about 22 m. As there is rarely very much current, this is a favorite site for beginners. A large portion of the reef is marked by giant steps of table coral which shelter the fish. You will see some isolated bommies of hard corals and some soft corals. You can spot sweetlips, groupers and snappers, angelfish and varieties of parrotfish. The site ends in a sandy bottom where it is the norm to find white tip and black tip reef sharks, rays, turtles and during the rainy season when the water is rich with plankton you have the chance of seeing passing mantas.

Deep Turbo

An interesting and popular dive site available to the experienced diver, Deep Turbo has a white sandy bottom between large sea mounds and coral canyons. Maximum depth is 32m with an average depth of 25m. The sea mounds and canyon walls differ in size and offer you an interesting collection of overhangs and outcrops, all covered in hard and soft corals. Huge sea fans and other interesting coral formations will fascinate you from start to finish. Barracuda, tuna, triggerfish, snapper and stingrays can all be expected to show up during the dive and you will be entertained by the hundreds of garden eels on the sandy bottom. Like at Simon's Reef you can sometimes spot a leopard shark along with white tip and black tip reef sharks. Deep Turbo is always a favorite as exploring the reef and its marine life makes for a truly fascinating dive.
